----- Cut here -----

File: uk.tube.xref.001

9 June 1996

Note: Part one of six parts.

British/American Tubes Cross-Reference

The following information is taken from an old cross-reference list in an AVO tube tester manual. The original source was probably a military cross-reference list.

Do ***NOT*** blindly use this data! Try to cross-check against another source before attempting a tube substitution. This is necessary because:

- a. The data in the text appears (to an admittedly untrained eye) to be full of typographical errors. I've undoubtedly added a few of my own typos, though probably far fewer than are already there.
- b. The data has *NOT* been cross-checked against any other source. This type of cross-check for validity is greatly needed (HINT: Any volunteers?).
- c. The British insistence upon using both the numeral "one" and the capital letter "I", as well as both the numeral "zero" and the capital letter "O" greatly complicated the task of typing the list (and prevented using a scanner and OCR software). For example, you will find "0A2" in both standard format and as "OA2" in the tables. Watch out for this type of trap.
- d. The concept of "equivalence" in this application can range from two tubes that are identical in all respects (size/shape, base, pin assignments, and performance) to a tube substitution which will require replacement of the tube socket, rewiring for a different pin arrangement, and maybe even modification of the biasing components. The text does *NOT* differentiate between these two extremes!

F I L E L A Y O U T

Commercial Valve Index and Cross Reference to British Service Types

uk.tube.xref.001: From 01A to 71A (indexed by tube type)

uk.tube.xref.002: From 71A3 to DL68 (indexed by tube type)

uk.tube.xref.003: From DL69 to RENS1834 (indexed by tube type)

uk.tube.xref.004: From RG1-204A to ZP590 (indexed by tube type)
From AD1 to CV841 (indexed by CV number)

GET BOATANCHORS UK.TUBE.XREF.01 (1/1)

uk.tube.xref.005: From CV842 to CV4002 (indexed by CV number)

uk.tube.xref.006: From CV4003 to VW48 (indexed by CV number)
Signal Corps (?) VT-numbered tube list
British Post Office VT Series Index
B.V.A. Utility Equivalents

Commercial Valve Index and Cross Reference to British Service Types

NOTE: Many of the commercial equivalents listed in the following pages will have different CV numbers, this due to special service requirements which do not affect the radio engineer -- e.g. interelectrode capacitance, bulb size, life test etc. It should also be noted that test data given in this manual may differ between different valves, due to different sets.
