

MODEL "C" RECEIVING SET.

GENERAL DESCRIPTION OF THE CIRCUIT.

The circuit is shown diagrammatically in Fig. 1.

MODEL C RECEIVING CIRCUIT.—DIAGRAM OF WIRING.

REFERENCE.

- A Patt. 1780 terminal plate earth.
- B Patt. 1073 breakdown fuse.
- C Patt. 2328 telephone switches.
- D Patt. 511 inductance aerial No. 5.
- E Patt. 2181 inductance aerial No. 1.
- F Patt. 2279 adjustable inductance.
- G Patt. 1797 condenser No. 14.
- H Patt. 4195 inductance coupling for buzzer tester.
- J Patt. 328 tumbler switch.
- K Patt. 1713 buzzer tester.
- L Patt. 2486A aerial condensers No. 7.
- M Patt. 2278 condenser No. 13.
- N Patt. 2429 condenser No. 8.
- P Patt. 2472 inductance mutual tuner No. 41.
- Q Patt. 1549 change-over switch.
- R Patt. 2473 telephone condenser.
- S Patt. 210 potentiometers.
- T Patt. 1138 switch protecting No. 2.
- U Patt. 309 detectors.
- V Batteries in convenient place outside office.
